

Manual inner sunblind

The manual inner sunblind is available for fixed and openable flat roof windows and skylights.
It can be installed in the daylight size of the curb, in or under the roof opening.
The sunblind is operated manually from the inside.

- can also be partially opened
- complete assembly kit (not pre-assembled), with screws and assembly manual
- an operation bar must be ordered separately
- opening systems always need to be provided with a manual or electric chain spindle, so the manual inner sunblind can be installed. Not possible for roof access skylights or SHE systems.

Attention! When choosing the correct size, please take the size E into consideration.

* Opening systems always need to be provided with a manual or electric chain spindle, so the manual inner sunblind can be installed.
